

Group Information

Project Name: Business Registration

Members

- Miles Hays
- Fortune Nwokejiobi
- Lucas Eifert

Brand Name: Business Registration Group

Bio: Modernizing the business registration portal for the State of Wyoming.

Summary

We are creating a functional demo of a modernized version of the state's business registration system, to include streamlined filing and business management.

Reference website <https://wyobiz.wyo.gov/Business/RegistrationInstr.aspx> - click Start

We intend to scale the concepts included in this initial registration wizard to the entire business registration system, in a format easy for business to use and easy for the state to translate into the existing framework.

Preliminary specifications

- Three distinct, isolated systems:
 - o Business portal
 - o Government portal
 - o Database backend
 - o Can only communicate through defined, secure protocol
- Major components:
 - o Frontend interface
 - Usability oriented
 - o Secure database connection
 - Authentication system
 - o Database backend
 - Form-equivalent records
 - o Government admin system
 - o Payment system hooks
 - o Draft system

This project will ease the burden on both businesses and the State of Wyoming for handling business registration, including by reducing the amount of forms businesses need to fill out and submit. The state would be able to monetize use of this system to increase revenue generated through the Secretary of State's office.

Planning & Timeline

By Oct 31:

- Meet with government representatives to determine precise specifications
- Research relevant forms and usability concerns

By Dec 8

- Finish web design through a web design interface like Figma
- Finish research on database system, form equivalency and usability concerns

Spring 2024

- Implement precise specifications determined in Fall 2023
